Azure App Service For Container With VSTS

Money Yu

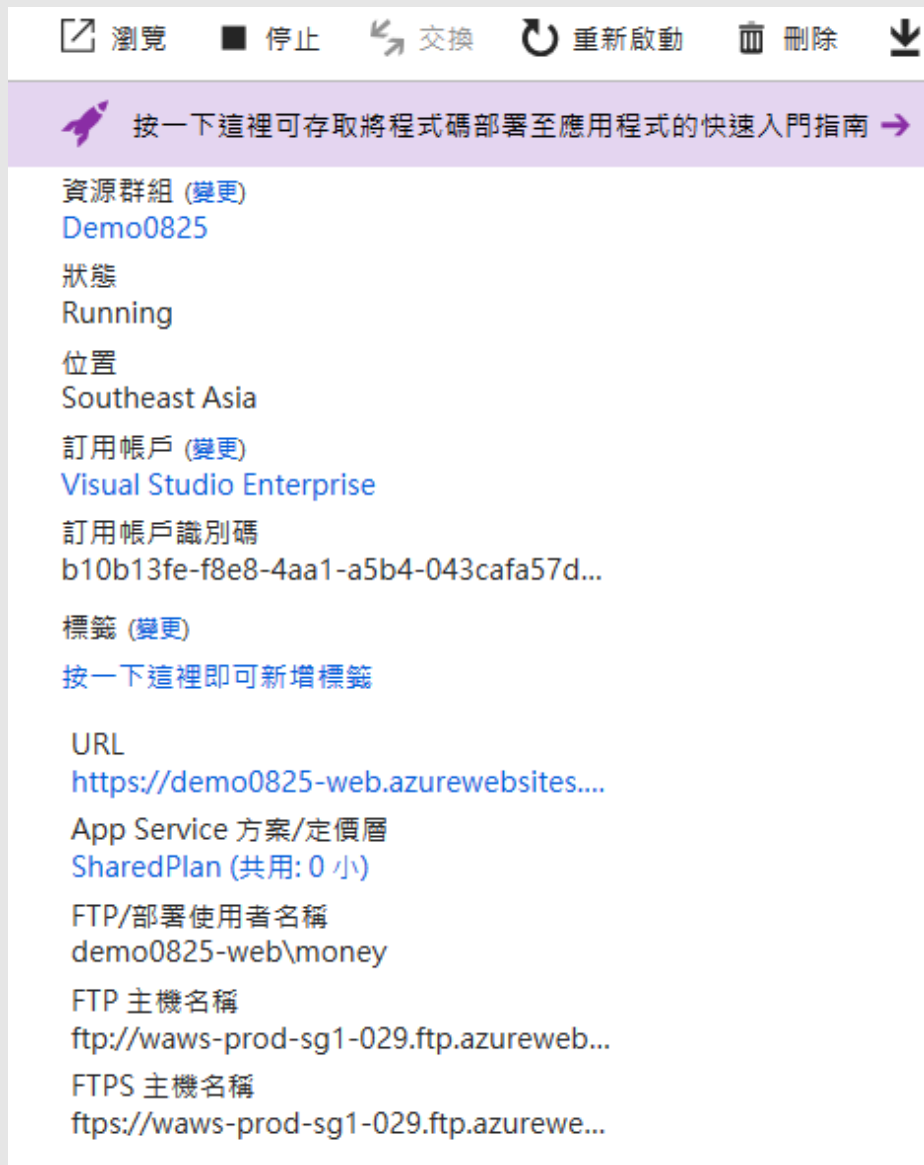

About Me

- 部落格：blog.developer.money
 - 學習學到老，撞牆撞到腦
- .NET、.NET Core、Azure、Cognitive Service
- Microsoft MVP
- Study4TW
- Azure Taiwan

大綱

- 科普
 - WebApp
 - Container & Docker
- Web App For Container
- 透過 VSTS 達成 CI/CD

Web App 是甚麼

The screenshot shows the Azure portal interface for a Web App. At the top, there is a navigation bar with icons for '瀏覽' (Browse), '停止' (Stop), '交換' (Swap), '重新啟動' (Restart), '刪除' (Delete), and '下載' (Download). Below the navigation bar, there is a purple banner with a rocket icon and the text '按一下這裡可存取將程式碼部署至應用程式的快速入門指南 →'. The main content area displays the following information:

- 資源群組 (變更) [Demo0825](#)
- 狀態: Running
- 位置: Southeast Asia
- 訂用帳戶 (變更) [Visual Studio Enterprise](#)
- 訂用帳戶識別碼: b10b13fe-f8e8-4aa1-a5b4-043cafa57d...
- 標籤 (變更) [按一下這裡即可新增標籤](#)
- URL: <https://demo0825-web.azurewebsites....>
- App Service 方案/定價層: [SharedPlan \(共用: 0 小\)](#)
- FTP/部署使用者名稱: demo0825-web\money
- FTP 主機名稱: ftp://waws-prod-sg1-029.ftp.azureweb...
- FTPS 主機名稱: ftps://waws-prod-sg1-029.ftp.azurewe...

- PaaS 服務
- 提供多個常用的快捷服務
- 快速佈建與部署
- 可自動縮放的安全平台
- 監視、警示及自動調整
- 佈署位置
- 應用程式設定
- A/B Test
- 網域 / SSL
- Vnet

Docker 是甚麼

- World's leading software container platform
- Containers are isolated, but share operating system (OS) and, where appropriate, binaries and libraries.
- Results in faster deployment, much less overhead, easier migration, and faster restart.

Why Containers?

Developers

- Enable 'write-once, run-anywhere' apps
- Enables microservice architectures
- Great for dev/test of apps and services
- Production realism
- Growing Developer Community

Operations

- Portability, Portability, Portability
- Standardized development, QA, and prod environments
- Abstract differences in OS distributions and underlying infrastructure
- Higher compute density
- Easily scale-up and scale-down in response to changing business needs

DevOps

在我電腦是上好的

Docker Terminology

- Docker images are read-only templates used to create containers. Each image contains a set of instructions for creating the containers, such as what programs to install, what folders and files to create, what volumes to mount, what port numbers to expose, and so on
- Docker Container is an isolated application platform. Containers are created from docker images.

Web App For Linux (支援 Container)

透過程式碼

透過 Container

Web App for Containers

- ✓ 快速部署到 Azure 雲端
- ✓ 根據需求簡單快速或自動的縮放
- ✓ Designed for your agile web development needs

Web App for Containers

High productivity development

Deployment with ease

CI/CD build and deploy

Testing in production

Staged deployment with slots

Fully managed platform

Built-in auto scale and load balancing

High availability with auto-patching

Monitoring and diagnosis

Backup and recovery

Enterprise-grade apps

Global data center footprint

Private registry support

AAD integrated

Secure + compliant

將你的應用程式容器化

Bring your own
runtime

Bring your own
stack

Joomla! CMS

本地佈署

Docker CLI

Use VS Code for Local development

Docker Extension

Managing of Docker Image

Docker Hub

Azure Container registry

佈署方式

Azure Container Registry

Docker Hub

Private registry

Continuous Delivery (Preview) – VSTS

開發與佈署流程

坦白從寬 牢底坐穿 抗拒從嚴 回家過年

Docker 新手

哪些地方會出錯 – Platform Issues

- Azure App Service depends on other services
 - SQL Azure
 - Storage
 - Network
 - Cloud Services (management)
- Azure App Service deployment gone bad
- Random bugs
- ASP.NET Core 2.1

如何進行疑難排解

- SSH
- Enable Diagnostics
 - Docker Logs
 - Server logs
- Best practices for logging to custom docker images

VSTS

- Triggers
- Build
 - Use Default Context
 - .
 - Image Name
 - Include Latest Tag
- Release
 - Image Name
 - Include Latest Tag

VSTS

- Agent pool
 - Hosted Linux Preview & Hosted VS2017
- 差在哪?
